

Create a database in cloudant DB

Team id	PNT2022TMID44233
Project Name	Smart waste management system for metropolitan cities

Step 1: login into IBM CLOUD account

Step2: On the top left corner click on RESORCE LIST

Step 3: Search for Database option then click on drop down arrow

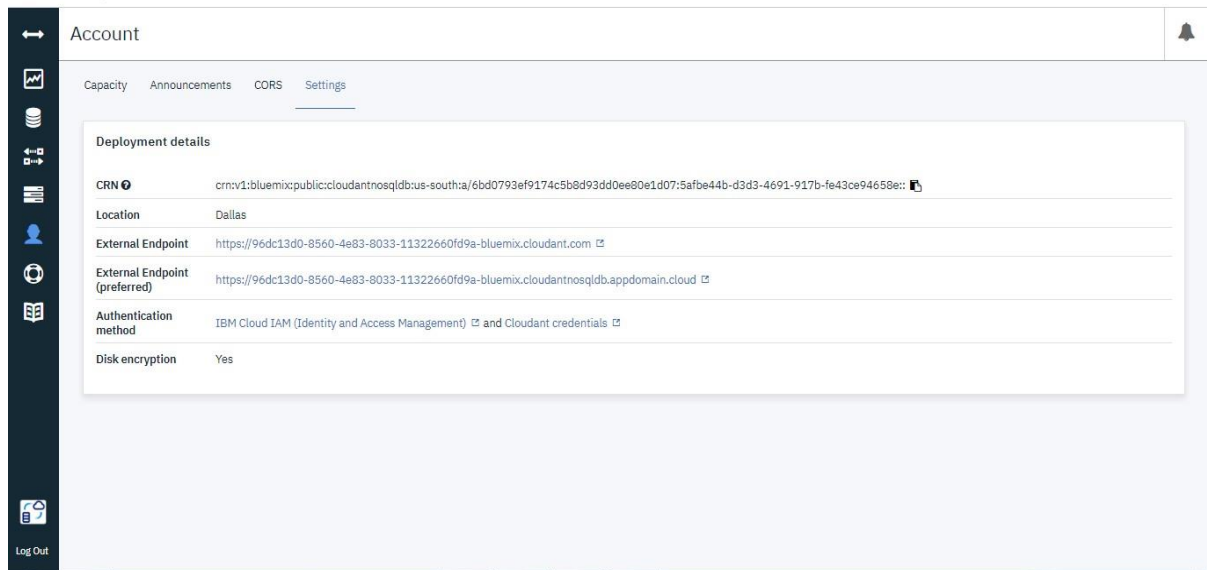

Step 4: Then click on cloudant account available

Step 5: Now, cloudant window appears then click on launch dashboard on right corner

Step 6: click on create database on right corner then provide the name for database and check the -partitioned - recommended for most workloads>option then click on create

Step 7: Finally, cloudant DB was successfully created.

Screenshots of cloudant account:

The screenshot displays the Nive application's document management interface. On the left is a dark sidebar with navigation icons for home, documents, query, permissions, changes, design documents, user profile, settings, and log out. The main header area includes a breadcrumb "nive", a "Document ID" dropdown menu, and links for "Options", "JSON", and a notification bell. Below the header, there are tabs for "All Documents" (active), "Query", "Permissions", "Changes", and "Design Documents". A blue "Create Document" button is located in the top right corner. The central workspace shows a large cloud icon with the text "No Documents Found" below it. At the bottom, a status bar indicates "Showing 0 documents" and "Documents per page: 20".
